LILACS

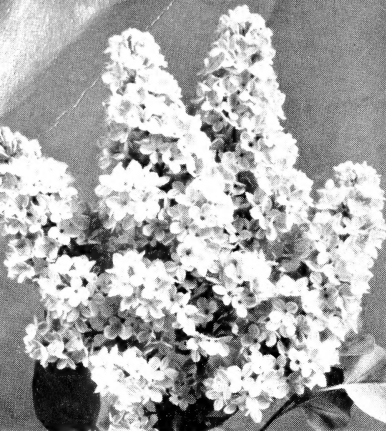

To You, it means that *now* you can possess Lilacs that bloom from May to July! *Now* you may have Lilacs that not only range from White through Lavender to deepest Violet, but also from palest Pink to dark Wine-Red . . . from delicate pastel Blue to rich true Blue! They're rare! They're lovely!

Andorra's research into the world of Lilacs has resulted in a most unusual collection—Lilacs that are new, more graceful in contour, more suited to our climate. This marvelous collection of *Andorra's* own propagation, growth and development includes over 100 of the best varieties. All the fine old favorites, scores of new beauties. Fragrant Lilacs, Persian and Hungarian Lilacs, Tree Lilacs, single and double Lilacs—and ALL are named varieties.

To introduce to you these new and lovely Lilacs, *Andorra's Landscape Architect* has selected three groups of unusual range and beauty of colors. Many varieties in these groups are from the selected list of the *best 100 Lilacs*. They are offered to you (on the next page) at VERY SPECIAL VALUES.

For several years *Andorra* has conducted exhaustive research and study with the Lilac Experts of Arnold and Swarthmore Arboretums. Now, at last, the glorious new strains are ready for you—and all are approved by the American Association of Botanical Gardens and Arboretums. Each of the groups below includes many of these rare varieties. We suggest that you order *promptly*, to be sure of getting *your* choice. **The enclosed card is for your convenience.**

These Andorra Lilacs are sturdy, true to name, will start to bloom this season! Plant them in April—they'll bloom from May on. Lilacs are undemanding: Give us sunshine and good drainage, they say, and we'll grow in any kind of soil!
